July 24, 2012

To Whom It May Concern:

Kasa Construction

In July 2012, Kasa Construction completed work on the Improvements of Oak Grove Drive from Foothill Boulevard to Berkshire place in the Cities of La Canada Flintridge and Pasadena Ca. This was an \$282,000 project that included both major street rehabilitation, and landscaping betterments. The project is on the frontage of the La Canada Flintridge High School, and the street serves as the primary access for Jet Propulsion Laboratory, which has around 20,000 employees.

Kasa's performance on this project was excellent and the project looks great. Kasa's staff was responsive and flexible. Kasa worked hard to keep the project on schedule and to mitigate the impact on the school and on JPL. In addition, Kasa's experienced staff was helpful in resolving typical construction problems such as changed conditions and interpretation and implementation of the Plans.

Kasa Construction and the City of Pasadena were able to work out contract problems, such as changes in scope of work in an open, fair, and expeditious manner.

The City of Pasadena would be happy to work with Kasa Construction on any future project. Please feel free to call me at for verbal confirmation of reference.

Sincerely,
